

**Amendments to the Abstract:**

Please insert the following paragraph as the abstract of the application being filed concurrently herewith.

The adapter device comprises a ring of flexible material, in particular card, having an outer perimeter which at least partly corresponds to the inner perimeter which at least partly corresponds to the outer circumference of a compact disc of a size smaller than the standard size. The adapter ring is folded along predetermined fold lines in such a way that when in the folded condition it can have dimensions which are close to or smaller than the external diameter of the compact disc.
